On the other hand, if the level is between “add” and “full,” and then engine was running quietly, you could have a bad oil pressure sending unit, light switch, or oil pressure gauge. You can safely drive home and have this fixed, but if the engine starts to sound noisy, stop immediately and call for a tow truck.

Is It Safe to Drive With the Oil Pressure Light On ...

Brake Lights: When illuminated with the engine on, the parking light is engaged. If this light pops on when you're not driving, make sure that the parking brake isn't engaged, and if it's not then check your brake fluid levels. Either your fluid is low, or there is a malfunction occurring in your brake system.

If the engine oil pressure warning light comes on, or if your dash gauge reads “Stop Engine–Low Oil Pressure,” stop driving immediately and turn the engine off. Until you know exactly what’s going on beneath the hood, you should assume that the warning light is correct and that your engine has lost normal oil pressure.

Chevrolet Silverado 2007-2013: Why is My Oil Pressure Low ...

If your check engine light has appeared due to overheating, you’ll probably notice other signs, such as a high temperature gauge or smoking from under the hood. This is a potentially severe problem, so look for the warning signs, reduce your speed, and attempt to reduce your engine temperature by turning on the heat as a release.

reset if the gauge shows ...

This is most likely a oil pressure sending unit. If this sending unit goes bad, it will set a check engine light and the pressure gauge will show zero pressure. The engine computer uses the sending unit to control the gauge. The sending unit is behind the intake so the intake will have to be removed to replace the sending unit.

Avalanche..the check engine light is on..oil pressure ...

The other answers here are correct. I have one other fact to add. Generally, it's a good idea to not let your car get less than 1/4th tank before you refill it. Modern cars generally have the fuel pump and fuel filter located in the gas tank. That...
